SANHUB

Progress pitching

Pitching Guide and
key point to consider

INTRODUCTION

SANHUB has a **pitching session on Friday** where each **trainee presents their project** to show what they've built and learning progress. Each presenter has to make a **PowerPoint (PPT) presentation** that highlights the main points trainers should focus on when pitching

Pitch Presentation Template for Trainee

Slide 1: Project Overview (cover page)

- Project name & short description
- Trainee names and role
- Problem the project solves (in one clear sentence)

Slide 2: Problem Statement

- What challenge or gap does this project address?

Slide 3: Solution / Product

- Your solution and how it works
- Key features (2-4 main ones)

Slide 4: Technology Stack

- Programming languages, frameworks, APIs, tools used
- (Optional: short explanation of why you chose them)

Slide 5: Development Process

- Challenges faced and how you solved them
- What you learned technically or personally

Slide 6: Results / Achievements

- What's working now?
- What have you completed so far?

Slide 7: Next Steps

- What still needs improvement or completion
- Future features or next milestones

Slide 8: Reflection

- How this project improved your development skills?

Slide 9: Demo or Showcase

- Live demo or short video (if possible)
-

★ Tips for Trainers

- Keep slides **visual** (less text, add screenshot where is necessary)
- PPT presentation take **5-10 minute**
- Practice a **3-5-minute clear pitch**
- Focus on **what you built, why it matters, and what you learned**
- End with confidence — “This project taught me X and improved my Y skills.”
